

With this program, your developers will become a security team in-house

Cheaper than on-side workshops, much more effective than online tutorials. Web Security Dev Academy is the most cost-effective investment in your team!

TrustScore 4.7 | EXCELLENT | [Read more](#)

Benefits for the company:

- ✓ New engineering skills in the team!
- ✓ Much more secure products!
- ✓ 12-week mentoring for developers
- ✗ **Without** hiring new team members!
- ✗ **Without** costly logistics (we work 100% online)
- ✗ **Without** losing team's work-days for full-day training (Academy requires ~2h weekly!)

"It helped us to pass the security pentest!" - Alex B. Web Developer, Hungary

Web Security Dev Academy is not yet another online course. It's a complete 12-week program designed to provide developers with the necessary hands-on skills and knowledge to build secure full-stack Web applications.
